

Kim Peckham, Hope Precinct Committeeman, Idaho Republican Party Platform Affirmation

As a new precinct committeeman I look forward to a better understanding of the process of our State and the workings of our county government.

I agree with the Idaho Republican Party Platform in all cases with the only exception being:

Article1 Section 1.B. I am uncertain barring more research the best way to fix Social Security. I think the statement is good but I need to study the subject to determine all points.

Article1 Section 2.C I agree with the Idaho's tax structure that it should be "predictable, fair and balanced" BUT not sure I agree with "the combination of our income, sales, and property taxes will continue to provide a stable dependable source of income for governmental needs". I do not agree with sales tax presently.

Article VI Section 4 I still need to understand this issue better. I do agree this is important for our state to determine their use of lands but I would like to hear more details on how we would do that. I could see how special interests could control some of these decisions to obtain land.

Article X1V Section 2.B. I am not sure what this is about and I look forward to investigating this further. But, for now, I do not agree. I think a license is good for traditional marriage.
